Chevron requests of the Bureau of Land Management a variance in the calibration frequency

the Apache Federal Com. Well no. 1 Meter No. 2300250102. This well averages

appx 45 MCFD and the meter in question is not the Custody Transfer Meter, but is the Allocation meter.

The average volume is appx. 100 mcf/d or less and has appx. 60% nitrogen. Because of the distances to reach

these leases, the low volume, and the high nitrogen content, Chevron is requesting a variance to allow semi-annual

calibrations and plate inspections on the meter in question. If you have any questions, please feel free to call me at

the address above and thank you for your consideration.
