If this is a pit closure: (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite ☒ offsite ☐ If offsite, name of facility: (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☒ Yes ☐ If yes, show depth below ground surface ft. and attach sample results.

(5) Attach soil sample results and a diagram of sample locations and excavations.

Additional Comments: All fluids were removed from the pit. The burial pit was constructed adjacent to the drilling pit. The burial pit was lined with a 12 mil liner. The pit liner and drilling material was placed in the burial pit, completely encapsulated and capped with a 20 mil liner, and covered with 3 feet of topsoil to grade.

Soil samples were collected below the liner, and results are attached. Additional soil was excavated from the site, to a depth of 14 feet in the NE corner, to 17 feet bgs in the center, to 18 feet bgs on the west side, and to a depth of 20 feet bgs in the SE corner. Additionally excavated soil was disposed at an NMOCD approved facility (Sundance).

The bottom of the excavation was covered with a 40 mil liner, and clean soil will be used to backfill the excavation. The area will be re-seeded following surface contouring.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☒, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
