Describe the proposed program. If this application is to DEEPEN or PLUG BACK, give the data on the present productive zone and proposed new productive zone. Describe the blowout prevention program, if any. Use additional sheets if necessary.								posed new			
								-			}
This well was re-entered during June 2007 to test the Strawn below 11,500'. We proposed to plug back to the											
Wolfcamp formation. This zone was previously produced from 9,692-9,866' prior to P&A in May 1996.											
A well servicing rig and reverse unit will be used for the operation. Standard 3000 PSI blowout equipment will											
be utilized during the operation. A closed-loop steel pit fluid containment system will be used.											
be during the operation. A closed-loop steel pit fluid containment system will be used.
