13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Please reference "Notice of Written Order" for site reclamation of October 31, 2007;

EnerVest Operating, LLC, as current operator of lease, has reached the attached agreement agreement with regards as to how the site will be reclaimed; as evidenced by her signature.

Work on this site will begin as soon as the weeds can be sprayed a couple of times to insure adequate spray to insure the roots and seedlings are no longer a threat to populate the area.

Conditions of approval, if any, are attached. Approval of this notice does not warrant or certify that the applicant holds legal or equitable title to those rights in the subject lease which would entitle the applicant to conduct operations thereon

Office

Title 18 U.S.C. Section 1001, and Title 43 U.S.C. Section 1212, makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction

Proposed Reclamation Procedure
Myers B # 2
Lea County, NM

We have 3 areas involved in this project:

- 1 Area 1 is 10,450 +/- Sq Ft pad and pit area
- 2 Area 2 is 6,050 +/- Sq Ft northerly weed exposed area
- 3 Area 3 is 3,325 +/- Sq Ft easterly weed exposed area

After checking on the estimated cost of disposing of these materials in the Sundance Land Farm Facility, I recommend the following:

- 1 Complete the careful spraying of the weeds on entire site
- 2 The pit area has a high chloride count. Carefully remove the top 6" and stockpile off of Mrs. Doom's property, on a site selected by William. Extreme caution to not disturb the well cuttings buried.
- 3 Remove cliché from pad area and stockpile with pit area diggings.
- 4 Mrs. Doom will be paid \$3/cubic yard for all removed diggings.
- 5 With BLM approval, purchase clay from Mrs. Doom or Sundance to replace what was removed. Mrs. Doom does not want to use cliché again.
- 6 Purchase top soil from Mrs. Doom to spread over new clay.
- 7 Purchase Mrs. Doom seed mix and not reseed until rainfall is pending
- 8 Areas 2 and 3 will be monitored throughout the summer and fall, with any new 'salt bush' growth being sprayed to prevent further growth.
- 9 The stockpiled soils will be handled as per MNOCD guidelines.

I, Rebecca J. Doom as the surface owner, have reviewed this procedure and hereby approve its implementation.

Rebecca J. Doom
