District IV

1220 S. St. Francis Dr., Santa Fe

Form C-144 CLEZ July 21, 2008

For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOCD District Office.

1000 Rio Brazos Road, Aztec, NM 87410 AUG 7 4 7AA3 Oil Conservation Division 220-South St. Francis Dr. apta Fe, NM 87505

## Closed-Loop System Permit or Closure Plan Application

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action: Permit Closure

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the nvironment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

## Closed Loop Operation & Maintenance Procedure During Re Entry Operations Using Reverse Units

All drilling fluid circulated over fine wire screens. Cutting using this system are composed of drilled out cement and rubber and metal from bridge plugs.

Fluid falls through screen into reverse unit tank. Cutting are dumped in to holding bin.

Fluid is continuously re-circulated through equipment with polymer added to aid lifting of cutting fines. Very few of these 'sweeps' will be required.

Roll off containers are lined and de-watered with fluids re-circulated into system. Reverse unit operation allows for very little fluid to be put in tank with cuttings.

Additional tank is used to capture unused drilling fluid or cement returns from casing jobs.

This equipment will be maintained 24 hrs./day by reverse unit personnel and or rig crews that stay on location.

Cuttings will be hauled to either:

CRI (permit number R9166) or GMI (permit number 711-019-001)

dependent upon which rig is available to drill this well.

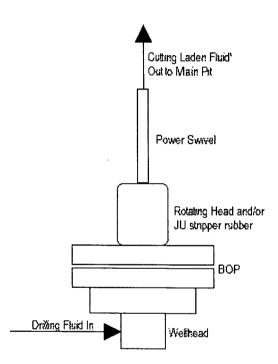

Hauf-off bin with cutting from plugs drifted out during re entry

Weil Service Unit Power Swivel is Suspended in the Dernok of the Unit
