13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Mack Energy Corporation as operator respectfully requests administrative approval to surface commingle and measurement of production. It is requested that surface commingling of Arkansas Junction; San Andres and Arkansas Junction; Bone Spring pools be approved for the following lease: Arkansas State(V-8144) Sec. 35, T18S, R36E

The tank battery is located in the NE/4 NE/4, Sec. 35 T18S R36E. Proper allocation for production will be measured using periodic well tests. Mack Energy has made notification to all parties owning an interest in this lease, including the oil purchaser, of the intent to commingle. Interests in all pools on this lease are common.

Mack Energy is currently producing the Arkansas State #1 in the San Andres and completing the Arkansas State #2 in the Bone Spring formation. Two more wells have been staked for future drilling. At this time we are requesting approval to add the Bone Spring to this production. Production is stabilized therefore allocation of added Bone Spring formation will be easily achieved.
