Oil Conservation Division
P.O. Box 1980
Hobbs,, NM 88240

Notice of intent,
EOR operating at One Riverway, Suite 610, Houston, TX 77056 is re-submitting the C-108 form with the Oil Conservation Division to continue injection of produced lease water from their Crossroads Silluro Devonian Unit into the Crossroads Siluro Devonian Unit Well # 304. The purpose is to have an order allowing the packer to be set higher than the 100 feet above the injection interval. If you are ok with re-submitting the C-108 from please notify William V. Jones PE in Santa Fe, NM so he can write it into the order.

Location of Well:
Crossroads Siluro Devonian Unit Well #304.
Unit Letter A, 660 feet from the North line and 660 feet from the East line.
Section 27, Township 9S, Range 36E, Lea County.

Proposed average and maximum injection rate:
Average injection rate 1200 bbl's per day.
Maximum injection rate of 2500 bbl's per/day.

Proposed average and maximum injection pressure:
Average injection pressure - 1000 psi.
Maximum injection pressure - 1500 psi.

Formation:
Devonian, Perforations at 12,089' - 12,095'.

Thank you,

Larry Spittler
