RE: Pennzoil 36 State Com 2 – Strawn and Bone Spring DHC - WITHDRAWAL  
30-025-35971  
Lea County, NM

Dear Ms. Mull,

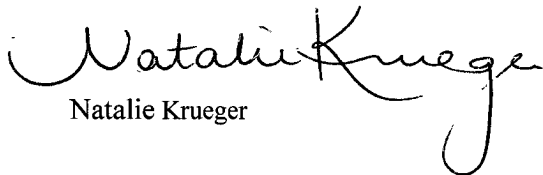

Enclosed, please find copies of 3 forms that Cimarex would like to rescind. When reading the well history report for this well, I incorrectly deduced that the CBP over the Strawn interval had been removed and that the Bone Spring and Strawn had been downhole commingled.

In fact, once the Bone Spring was completed, it was shut in behind a packer, and the Strawn is the only interval that is currently producing. The CBP @ 10367' was indeed removed, but a packer was installed @ 12154' to prevent Bone Spring communication while our hearing at Santa Fe for an Apache Ridge; Bone Spring allowable increase was being heard.

Could you please withdraw the C-103 and 2 C-104s that are attached? Once the Bone Spring and Strawn are DHC, we will send in new C-103s and C-104s to reflect the correct percentages and whatnot.

If you have any questions or need further information, please me at 469-420-2715. Sorry for the inconvenience and thanks for your help.

Sincerely,

  
Natalie Krueger
