13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This well resumed production on July, 11 2008. There was no well service involved in returning to production status. Due to the low production level of this well it is uneconomical to repair and or replace production equipment at the existing facility. Both oil tanks have holes in them and the heater treater would need extensive repairs as well. We have repaired facilities shuch as this one in the past with some success, but it has cost us between \$50,000 to \$80,000 dollars to accomplish.

This well produces approximately 1 bbl/d of oil and 20 bl/d of water. To date the well has produced 238 bbl of oil, with no sales. All production is currently producing into a rental frac tank.

Denied! A Rental Frac Tank Is Not Acceptable For Storage & Measurement Of Oil. Also, The BLM Requires A 5-Day Notification Prior To Returning A Well To Production.
