13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Apache TA'd this well via the following procedure:

1. POOH laying down all rods and lay down pump.
2. Tally out of the hole w/ 2-7/8" tubing.
3. RIH and set CIBP @ 11,350'. Dumped 20 sx cmt on CIBP.
4. RIH w/ 2-7/8" tubing, circ well w/fresh water pkr fluid. POOH laying down 2-7/8" tubing.
5. Test casing to 500 psi. Held good and witnessed by BLM.

After 8-20-2009 the well must be online or plans to P & A must be submitted.

Please put this well in TA'd status.

TA Approved 7:11 8/20/09

Justification and future plans: (approved pending 500 psi pressure chart)

The pump and tubing are plugging up with formation fines; third time this has happened in two months. Not sure if the fines are coming from the producing formation or from a casing part. Would like to TA well for a couple of years, anticipating better prices, then a clean out and acid job should alleviate the problem.
