13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This notification is submitted to note that the actual surface hole size and surface casing weight as run were different from the permitted surface hole size and surface casing weight.

Permitted Surface Hole Size and Surface Casing Weight:

McElvain Oil & Gas Properties, Inc. received approval to run 8.625", 24 #/ft, J55, ST&C surface casing in an 11" hole via our approved APD dated 8-4-08.

Actual Hole Size and Surface Casing Weight:

New 8.625", 32#/ft, J55, ST&C casing was actually run and set in a 12.25" drill hole on 1-6-08 at a landing depth of 1,826' KB following a fluid caliper survey conducted at 1,544' (this caliper survey indicated a 71% hole wash-out). An estimated 125 of the 320 total bbls of cement slurry pumped were returned to surface with full returns and no fallback.
