$$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$$

Conclusions: The results of this study suggest that the use of a computerized decision support system can improve the quality of the decision-making process in the management of the patient with a suspected acute myocardial infarction. The use of a computerized decision support system can also improve the quality of the decision-making process in the management of the patient with a suspected acute myocardial infarction.
