13. Describe Proposed or Completed Operation (clearly state all pertinent details, included estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

According to BLM Written Order No. 3160 (NMP0130), Case/Lease No. NMNM 016663, Order No. 04-027-09W, Cimarex needed to comply with several requests regarding the environmental quality of the wellsite, outlined below.

- Tank Battery Berm deteriorated. Construct a berm/dike around all tank battery, separation, and treatment equipment.
- Stock oil of oil saturated soil. Remove and dispose.
- Discarded idle production equipment on pad. Remove.

Cimarex has remediated all issues as of the week of July 13th, 2009, except for a cement base on the west side of the wellhead. To protect the integrity of the well bore, we are requesting to leave the pump base in place until the well is PA'd and the location reclaimed.

The location has been pre-inspected by the BLM's Randy Legler.
