RE: Consent to Drill Eugene Wood #16
Grayburg Test
Langlie Mattix; 7 Rvrs-Q-Grayburg Pool
Section 22-T22S-R37E
330' FNL & 990' FEL
Lea County, New Mexico

30-025-39517

Dear Rusty,

Apache Corporation ("Apache") requests Legacy Reserves, L.P.'s consent to drill the Eugene Wood #16 Well at the referenced location to a total depth of 4,400' to test the Grayburg formation. The proposed well is located within the Pool boundaries of the Langlie Mattix; 7 Rvrs-Q-Grayburg Pool, which is the same pool designated to Legacy's Langlie Mattix Penrose Sand Unit. Apache's records indicate the unitized interval of said Unit is from the lower 100' of the Seven Rivers formation and all of the Queen formation.

Please sign in the space provided below to indicate your consent of Apache's proposal to drill its Eugene Wood #16 well at the location specified above and to complete said well in the Grayburg formation.

Yours Truly,
APACHE CORPORATION

Legacy Reserves, L.P. hereby offers its consent
for Apache to drill its Eugene Wood #16 Well
as proposed above in this letter.
