Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection)

Yates Petroleum Corportation respectfully requests permission to change the 2nd intermediate setting depth and kick off method to the follow 7" second intermediate casing will be set approx. 80-100' above kick off point. 2 7/8" fiberglass tubing will be attached to the bottom of the 7" casing with a drillable swedge and will extend to TD of the pilot hole. The fiberglass tubing and 7" casing will then be cemented to surface lea a solid plug of cement inside the fiberglass tubing up to the float collar in the 7" casing, which will be used as an isolation and kick off plug. It is believed that the 7" casing will need to be cemented with two and possibly three stages. New cement program will be provided once cer company runs frac simulation program.

Exact kick off point to be determined after pilot hole logs are evaluated.
