NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 5 bbls	Volume Recovered
Source of Release Flowline	Date and Hour of Occurrence	Date and Hour of Discovery 11-6-08
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Larry Johnson-NMOCD	
By Whom? Rick Kerby	Date and Hour See above	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Flowline leaked causing fluid to escape onto ground

Describe Area Affected and Cleanup Action Taken.*
Site will be delineated for extent of contamination, and work plan will be submitted

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Isaac Kincaid	SESI	575-390-8841	ikincaid@sesi-nm.com

II. Background

Safety and Environmental Solutions, Inc. (SESI) was engaged by Oxy USA to perform remediation services at the Antelope Ridge 11 spill site. This leak was caused by a corroded valve. There were 5 barrels of produced fluids released.

III. Surface and Ground Water

The closest groundwater of record with the USGS database is located in Section 32, Range 23S, and Township 34E. The depth of water in this well was 207' in 1996.

IV. Work Performed

November 7, 2008 SESI was onsite to assess the location. Ed Hale, contract pumper for Oxy, was onsite and stated that the release occurred on 11/6/08 and affected an area 20' north, 10' south.

On June 4, 2009 SESI was onsite to perform clean-up services. The contaminated soils around the valve area of the separator were removed to a depth of 36". All contaminated soil was excavated and disposed of at a NMOCD approved facility. The excavated area was then backfilled to a depth of 48" with approximately 4 yards of clean from an offsite facility.

V. Figures & Appendices

This is an active well. It is requested that no further action will be taken.
