No. 04-013-10W

3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BLA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Cameron Oil & Gas Co., Inc. is proposing to correct the following Environment Problems:

Enviorn. Prob. 1: We feel that a new archaeological survey will not be required since the corective actions will be limited to the existing well pad.

Environ. Prob. 2 & 3: The existing natural surface of sandy loam will create a good soil base to plant the required seed mixture as it has for the north and east side of the pad. Some good grass starts are already in the SW qtr. The existing bare portions of the pad will be worked and planted as required. A berm 2 feet high and 200 feet +/- long, or as required, will be placed on the west side of the pad between the two-track road and the pad.

BLM will be notified before the surface work is started and a meeting in the field can be arranged at that time.

On February 17, 2010; BLM representative Randy Legler and Cameron, Representative Bill Sweatt, conducted an on-site for the #1 Federal 4. The purpose for the onsite was to establish if the surface reclamation work could be done within the existing disturbed area flagged by BLM. Mr. Sweatt determined they could stay within the area identified, therefore no additional new disturbance will occur with the reclamation procedures and additional archeological survey is not necessary.

14. I hereby certify that the foregoing is true and correct
