Form C-144 CLEZ July 21, 2008

Energy Minerals and Natural Resources
Department
Oil Conservation Division
1220 South St. Francis Dr.

State of New Mexico
For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOCD District Office.

Closed-Loop System Permit or Closure Plan Application (that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action:	X Permit Closure
Instructions: Please submit one application (Form C-144 CLEZ) per indivictored-loop system that only use above ground steel tanks or haul-off bins a	vidual closed-loop system request. For any application request other than for a and propose to implement waste removal for closure, please submit a Form C-14

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.		
Operator: CIMAREX ENERGY CO. OF COLORADO OGRID#: 162683		
Address: 600 N. MARIENFELD, SUITE 600, MIDLAND, TEXAS 79701		
Facility or well name: NORTHSHCRE WOOLWORTH #005		
API Number: 30-025-26665 OCD Permit Number: P1-01886 U/L or Qtr/Qtr C Section 33 Township 24S Range 37E County: LEA

Closed-Loop Design Plan:

The closed loop system will not entail a drying pad, temporary pit, below grade tank or sump. It will entail an above ground haul-off bin sultable for holding the cuttings and fluids for rig operations. The haul-off bin will be of sufficient volume to maintain a safe free board between disposal of the liquids and solids from rig operations.

- 1.) Fencing is not required for an above ground closed-loop system.
- 2.) This site will be signed in compliance with 19.15.3.103 NMAC.
- 3.) Please see attached Closed-Loop System diagram.

Closed-Loop Operating and Maintenance Plan:

In order to protect public health and environment, the closed-loop haul-off bin will be operated and maintained to contain liquids and solids. This will aid in the prevention of contamination of fresh water sources. To attain this goal the following steps will be followed:

- The solids and liquids in the closed-loop haul-off bin will be transported off the drilling facility and disposed of at the CRI facility (Permit No. R9166) in Halfway, NM on a periodic basis once a bin is determined to be at full volume capacity.
- No hazardous waste, miscellaneous solid waste or debris will be discharged into or stored in the tank. Only fluids or cuttings used or generated by rig operations will be placed or stored in the tank.
- The division district office will be notified within 48 hours of the discovery of compromised integrity of the hauf-off bin. Upon the discovery of the compromised hauf-off bin, repairs will be enacted immediately.
- 4.) All of the above operations will be inspected and a log will be signed and dated. During rig operations, the inspection will be daily.

Closed-Loop Closure Plan:

The hual-off bin will be maintained in accordance with 19.15.17.13 NMAC. This will be done by transporting and disposing all cuttings and liquids to the CRI Facility (Permit No. R8166) during and immediately following rig operations. The haul-off bins will be removed from the location as part of the rig move. At the time of well abandonment, the site will be reclaimed and re-vegetated to pre-existing conditions when possible.
