PLAN OF DEVELOPMENT

Mack Energy Corporation Peery Federal Lease Section 29 T15S R30E Chaves County, New Mexico

Forms 3160-5 (Sundry to construct New Tank Battery) Due to be submitted requesting new larger facility to handle increased production. This applications are presently being held pending the submittal of a "Plan of Development".

WELL LOCATIONS

Attachment 1 shows the locations of existing and proposed wells, as well as current and proposed facilities. Mack energy has a total of 19 wells on this lease. Wells consist of Abo, Wolfcamp and SWD. **Current:** #4-SWD, #5-Wolfcamp, #6-Abo, #7-Wolfcamp, #11-Wolfcamp. **Proposed:** #8-Abo, #9-Wolfcamp(Drilling), #10-Wolfcamp, #12-Wolfcamp, #13-Wolfcamp, #14-Wolfcamp, #15-Wolfcamp, #16-Abo, #17-Abo.

PRODUCTION FACILITIES

Attachment 1 depicts the present and proposed facilities. **Current:** Wolfcamp production is being produced at the facility located at the Abandoned #2 location. Abo production is being produced at the #6 well location. **Proposed:** We are proposing to build a new Wolfcamp facility at the site of the #7/#8 locations which are combined. The east edge of these two locations will be extended 50' to the east and 400' parallel to these locations, see attachment 2. This facility will contain 1 8'x20' water knock out, 3 30"x10' separators, 3 8'x20' heaters, 4 1000bbl oil tanks, 2 500bbl water tanks. We will continue to use the other Abo and Wolfcamp facilities as needed.

PIPELINES

All existing gas lines and flow lines are shown on Attachment 1. The proposed facility will require a gas sales line to be installed, via DCP. All proposed wells will be connected to these facilities according to production status.

POWER LINES

Attachment 1 shows the existing and future wells, due to the existing power line system minimal powerline construction is needed. Future power line will be confined to access road right of way.

If you have any questions please let me know at (575) 748-1288.

PECOS DISTRICT - RFO CONDITIONS OF APPROVAL

May 26, 2010

OPERATORS NAME: Mack Energy Corporation LEASE NO.: NM- 119274 FACILITY NAME: Facility A Wolfcamp SURFACE: 2285' FSL & 225' FWL LOCATION: Section 29, T. 15 S., R. 30 E., NMPM COUNTY: Chaves County, New Mexico

GENERAL PROVISIONS

The approval of the Sundry is in compliance with all applicable laws and regulations: 43 Code of Federal Regulations 3160, the lease terms, Onshore Oil and Gas Orders, Notices To Lessees, New Mexico Oil Conservation Division (NMOCD) Rules, National Historical Preservation Act As Amended, and instructions and orders of the Authorized Officer. Any request for a variance shall be submitted to the Authorized Officer on Form 3160-5, Sundry Notices and Report on Wells.

I. CONDITIONS OF APPROVAL

All conditions mentioned below must be met for the following construction of this facility.

II. ARCHAEOLOGICAL, PALEONTOLOGY & HISTORICAL SITES

Any cultural and/or paleontological resource discovered by the operator or by any person working on the operator's behalf shall immediately report such findings to the Authorized Officer. The operator is fully accountable for the actions of their contractors and subcontractors. The operator shall suspend all operations in the immediate area of such discovery until written authorization to proceed is issued by the Authorized Officer. An evaluation of the discovery shall be made by the Authorized Officer to determine the appropriate actions that shall be required to prevent the loss of significant cultural or scientific values of the discovery. The operator shall be held responsible for the cost of the proper mitigation measures that the Authorized Officer assesses after consultation with the operator on the evaluation and decisions of the discovery. Any unauthorized collection or disturbance of cultural or paleontological resources may result in a shutdown order by the Authorized Officer.

III. NOXIOUS WEEDS

The operator shall be held responsible if noxious weeds become established within the areas of operations (access road and/or well pad). Weed control shall be required on the disturbed land where noxious weeds exist, which includes the roads, pads, associated pipeline corridor, and adjacent land affected by the establishment of weeds due to this action. The operator shall consult with the Authorized Officer for acceptable weed control methods, which include following EPA and BLM requirements and policies.

IV. CONSTRUCTION

A. NOTIFICATION:

The BLM shall administer compliance and monitor construction of Facility. Notify the Roswell Field Office at (505) 627-0209 at least 3 working days prior to commencing construction of the Facility.

When construction operations are being conducted on this Facility, the operator shall have the approved Sundry and Conditions of Approval on the Facility site and they shall be made available upon request by the Authorized Officer.

B. Power line:

All power lines to Facility shall be buried.

C. PITS:

No pits allowed

D. Facility Diagram:

Upon completion of facility, operator shall submit a facility diagram according to 43 CFR 3162.7-5 (d).

V. FEDERAL MINERAL MATERIALS PIT:

Payment shall be made to the BLM prior to removal of any federal mineral materials from any site. Call the Roswell Field Office at (505) 627-0236.

A. Containment Structures

The containment structure shall be constructed to hold the capacity of the entire contents of the largest tank, plus 24 hour production, unless more stringent protective requirements are deemed necessary by the Authorized Officer.

B. Painting Requirement

All above-ground structures including meter housing that are not subject to safety requirements shall be painted a flat non-reflective paint color, <u>Juniper Green</u> (Standard Environmental Color Chart June 2008).

VI. VRM Facility Requirement

Tanks not greater than fifteen-feet-high shall be used.

VII. INTERIM RECLAMATION

During the life of the development, all disturbed areas not needed for active support of production operations should undergo "interim" reclamation in order to minimize the environmental impacts of development on other resources and uses. Earthwork for interim and final reclamation must be completed within 6 months of well completion or well plugging (weather permitting). The operator shall submit a Sundry Notices and Reports on Wells (Notice of Intent), Form 3160-5, prior to conducting interim reclamation.

During reclamation, the removal of caliche is important to increasing the success of revegetating the site. Removed caliche may be used in road repairs, fire walls or for building other roads and locations. In addition, in order to operate the well or complete workover operations, it may be necessary to drive, park and operate on restored interim vegetation within the previously disturbed area. Disturbing revegetated areas for production or workover operations will be allowed. If there is significant disturbance and loss of vegetation, the area will need to be revegetated. Communicate with the appropriate BLM office for any exceptions/exemptions if needed.

1. FINAL ABANDONMENT & REHABILITATION REQUIREMENTS

- a) Upon abandonment of the well and/or when the access road is no longer in service, a Notice of Intent for Final Abandonment with the proposed surface restoration procedure must be submitted for approval.
- b) Upon abandonment of the well, all casing shall be cut-off at the base of the cellar or 3-feet below final restored ground level (whichever is deeper). The well bore shall then be covered with a metal plate at least ¼ inch thick and welded in place. The following information shall be permanently inscribed on the dry hole marker: Well name and number, the name of the operator, the lease serial number, the surveyed location (the quarter-quarter section, section, township and range or other authorized survey designation acceptable to the authorized officer; such as metes and bounds).
- c) Surface Reclamation must be completed within 6 months of well plugging. If the operator proposes to modify the plans for surface reclamation approved on the APD, the operator must attach these modifications to the Subsequent Report of Plug and Abandon using Sundry Notices and Reports on Wells, Form 3160-5.

VIII. SEASONAL DRILLING REQUIREMENT

1. Lesser Prairie Chicken Stipulation:

The Roswell Approved Resource Management Plan and Record of Decision addresses the preservation of the Lesser Prairie Chicken wildlife habitat.

a. There shall be no earthmoving construction activities, well exploratory and/or developmental drilling, well completion, plugging and abandonment activities, **between March 1st through June 15th**, of each year. During that period, other activities, including the operation and maintenance of oil and gas facilities, will not be allowed between **3:00 A.M.** and **9:00 A.M.**. To the extent practicable, activities occurring for a short period of time may be conducted so long as they do not commence until after **9:00 A.M.**. Any deviation from this stipulation must be approved in writing by the Roswell Field Office Manager or the appropriate Authorized Officer.

b. All motors or engines that produce high noise levels shall have mufflers installed that effectively reduce excessive noise levels within prairie chicken habitat. High noise levels produced by motors or engines shall be reduced and muffled so as not to exceed **75 db** measured at 30 feet from the source of the noise.

c. Upon abandonment of the well, reclamation activities can be conducted between March 1st through June 15th, so long as reclamation work shall not be conducted between the hours of 3:00 AM to 9:00 AM. Any deviation from this requirement shall require prior approval by the Authorized Officer.

d. In an emergency situation, the Authorized Officer can allow a pit to be constructed for the purpose of collecting crude oil for removal. To prevent wildlife from entering the pit, netting of adequate size to deter access by wildlife shall cover the pit until it is no longer a threat to wildlife, and the pit is reclaimed.
