On 05/23/2010 the flowline coming from the MC Federal #4 well ruptured at a road crossing releasing 9bbls of fluid onto the road. We were able to pick up 8bbls of fluid with a vacuum truck. The release did cause a small amount of overspray into the pasture to the northwest with the dimensions of 10' x 20'. the flowline has been repaired and put back into service. The legal description is below:
