13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 06/09/2010 at 4:00 p.m. we had a flowline release coming from the BC Federal #11 well. The location of the release is 200 yards north of the well location in the pasture. We initially released 4bbls of oil and produced fluids and were immediately able to recover 3 bbls with a vacuum truck. The release is of non-reportable quantity but it did cause an area of overspray measuring 10 yards x 15 yards. The GPS coordinates of the spill area are as follows:

32 49.444 - 103 46.165

We will await further instruction to remediate the oversprayed area after submission and finalization of this sundry.

* No Action needed @ this time J. Russo

14. I hereby certify that the foregoing is true and correct.
