13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

As indicated on the previous sundry in March 2009, the SEMU # 62 is being held as a possible replacement for the SEMU # 104. Currently, the # 104 is producing from the Blinberry-Tubb only. An attempt was made to add the Drinkard to the 104 but wellbore problems prevented this from being a successful completion. Recent review of the # 62 indicate potential for a Drinkard completion or an Abo completion and is currently having economic review being done. It is our intent to complete this review and make a decision on how to proceed by year end 2010. By year end, either a notice of intent for this additional work or notice of intent to plug and abandon will be submitted for approval.
