13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Since the BLM requires surface to be set at 1,620', Read & Stevens, Inc. is requesting to "not" run a DV on the 5 1/2" csg and to put the TOC @ 1,000'. This should allow for protection of all potential water zones as long as cmt is at the surface for the 8 5/8" csg.

More cmt on the 5 1/2" string could potentially damage the producing zone (Yates).

Spud date is set for July 28th. Please respond on or before this date.
