13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 07/14/2010 we had a release on the Pronghorn SWD system 8 inch main line. We initially released 100 bbls of produced water and were able to recover 70 bbls with a vacuum truck. The bulk of the fluid remained on the COG ROW. A small amount of fluid did reach a nearby Mewbourne lease road measuring an area of 40 yards x 5 yards. The spill area in the pasture measured an area of 20 yards x 10 yards.

The closest well location to the release is as follows:

(This well site is 200 yards northeast of the spill site)
