13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

This Sundry Notice is to request a variance concerning the BLM requirement established on November 20th, 2009 by Mr. Jared Reese BLM representative, Roswell office. Jared Reese, Al Collar, and I (Andy Price, Consultant for EnerVest Operating), met on site to review the current remediation project being conducted. Mr Reese identified a 30ft. separator at the south east side of the location which is no longer in service and poses a hazard for birds which may possibly nest in the unit and should be removed. EnerVest is not clear at this time if this unit will be used on this location or one of the surrounding locations.

This variance request is to "leave the separator on site and adequately seal off all openings of the unit in order to prevent any wildlife from entering the unit".
