13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Facility repair to oil storage tanks and water tank.

This well will be returned to production as soon as the oil/water storage tanks have been properly repaired - cleaned/sand blasted/repared and plastic coated.

Work has commenced and should be completed within the month of July, 2010.

This well was producing into a frac tank and the production metohd was denied by the BLM in 2009. The well has not produced since, but is capable of producing paying quantities and in the event that sub-surface repairs need to be addressed once facility improvements are complete the downhole work will be done at that time.
