13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This is a request to maintain this well on temporary status. The LaMunyon No. 2 is a direct offset to Oxy's Langlie Mattix waterflood and as such it is possible that the well will respond to the waterflood. This has happened on another well that we operated that is an offset to this same flood. As with any waterflood, it is impossible to accurately predict a time frame that the well may respond. Plugging this well may result in a loss of revenue for the BLM. We check this well every year to see if it has responded to the waterflood by swab testing. The casing on this well was tested 1/18/00. In addition this well was cemented w/ 1850 sx. and should not pose a pollution or environmental threat. If the TA status cannot be approved, we will P&A this well.

NOTE: 4 previous TA approvals on file

CIT: 1/18/00

\* By ending date, either put well to use or submit plugging procedure.

TA APPROVED FOR 12 MONTH PERIOD  
ENDING 1/18/05
