CLOSED LOOP OPERATION & MAINTENANCE PROCEDURE

All drilling fluid circulated over shaker(s) with cuttings discharged into roll off container.

Fluid and fines below shaker(s) are circulated with transfer pump through centrifuge(s) or solids separator with cuttings and fines discharged into roll off container.

Fluid is continuously re-circulated through equipment with polymer added to aid separation of cutting fines.

Roll off containers are lined and de-watered with fluids re-circulated into system.

Additional tank is used to capture unused drilling fluid or cement returns from casing jobs.

This equipment will be maintained 24 hrs a day by solids control personnel and/or rig crews that stay on location.

Cuttings will be hauled to either:

CRI (Permit Number NM-01-0006)

Sundance Graybold Disposal (Permit Number NM-01-0003)

dependent upon which rig is used to drill this well.
