October 8, 2010

Dear Operator.

During recent inspections of the wells listed below, Lea County, New Mexico, the discovery of idle electric power pole(s) and electric line was noted. Hobbs District 1, OCD office is taking an active role in the elimination of idle power pole(s) and overhead electric wire after the wells have been plugged and abandoned. If future operations do not require the existing power system, OCD would ask that the "Electric Power Supplier" be notified and request removal. OCD feels that the removal will eliminate future problems of downed poles and line due to weather conditions, grass fires or aging equipment.
