Midland, TX 79705

Dear Operator.

During recent inspections of the State RA well(s) located in Sec 31 T18S R36E, Lea County, New Mexico, the discovery of several idle electric power poles and electric line was noted. Hobbs District 1, OCD office is taking an active role in the elimination of idle power poles and overhead electric wire after the wells have been plugged and abandoned. If future operations do not require the existing power system, OCD would request removal of poles and line. OCD feels that the removal will eliminate future problems of downed poles and line due to weather conditions, grass fires or aging equipment.

State RA #1 30-025-03979

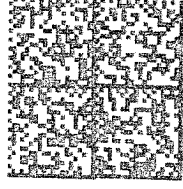

Total of 8 poles, overhead lines, and 1 set of transformers.  
1<sup>st</sup> pole and transformers north of location has broken off and is laying on the ground.

Respectfully,

Mark Whitaker  
OCD District 1, Compliance Officer
