Re: Emergency/Temporary Pit Violations  
Antelope #1 **30-025-38867**  
Lea County, New Mexico

Dear Mr. Brown:

As per your letter of November 9, 2010, the contents from the depression area on the north edge of the site pad have been removed, the area has been filled in and leveled. The location is ready for inspection.

The area was never considered a trash pit or an emergency pit. It was a fire wall in case a DST was required when drilling the well.

Very truly yours,

Donnie E. Brown *bao*  
Petroleum Engineer
