13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

I have received a letter (reference # 3162.4) stating our Federal D location did not pass the final inspection due to electrical lines and power poles not being removed. The power lines belong to us and we have notified the land owner, OCD & BLM that we would not be removing the power lines as we might need them in any further Water Flood expansion. If we remove them we will be giving up the Right Of Way, we would have to get new Right Of Ways if we expand.
