**Re: South Justis Unit Waterflood Project**

SOUTH JUSTIS UNIT Well No. 232 (API No. 30-025-31864)  
Unit A, Section 26, T25S, R37E, NMPM, Lea County  
Justis Blinbry-Tubb-Drinkard (R-9745)

You have submitted a request on behalf of Legacy for clarification of the allowable packer setting depth.

Your correspondence states the permitted packer setting depth 4967 feet loses 100 psi in 5 minutes and fails MIT. You have requested a new packer setting depth of 4900 feet in order to get a good MIT and meet state and federal standards.

Records indicate the top of the Justis Blinbry-Tubb-Drinkard unitized interval is 4980 feet. Your requested packer setting depth of 4900 feet is within 100 feet of the Justis Blinbry-Tubb-Drinkard unitized interval.

Your new packer seat at **4900** feet for API No. 30-025-31864 is hereby **approved**.

Sincerely,

Daniel Sanchez  
Acting Director
