RE: Inspection Findings, and Corrective Actions NM108507: Elliams Federal 3 2308' FNL & 660' FWL, Sec. 34, T17S-R33E Lea County, New Mexico

The referenced well was inspected 12/22/10. The following issues were identified and need to be addressed within the next 60-90 days.

The power poles and lines need to be removed back to the main line. The steel flowline entering the location from the west side needs to be removed. Trash around the outer edge of the location needs to be picked up and disposed of. If any questions, please contact Jim Amos at 575-234-5909.

Thanks,

T

James A. Amos Supervisory EPS Carlsbad Field Office
