13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

After testing Blinebry perms 5481'-5654' for approx 17 days, it has been determined that commercial production does not exist from the Blinebry perms, therefore Saga proposes to remove the RBP & DHC production from the Tubb & Blinebry.

WI, ORRI, etc are the same for both zones, production is compatible. Surface commingling of the Blinebry, Drinkard & Tubb zones exist for wells #3, #4 & #5.

**SUBJECT TO
