(State names of and		
Plans are t	expected depths to objective and spints, and all	sizes, weights, and lengths of proposed casings; indicate mudding jobs, coment- rother important proposed work)
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, coment- rother important proposed work)
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- letter important proposed work) casing in hole, to cement off sand section, pe in place and cap.
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- letter important proposed work) casing in hole, to cement off sand section, pe in place and cap.
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- letter important proposed work) casing in hole, to cement off sand section, pe in place and cap.
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, comentiother important proposed work) asing in hole, to dement off sand section, pe in place and cap.
Plans are t	expected depths to objective and a show a ling points, and all to leave 600 ft. of 52th c	sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- letter important proposed work) casing in hole, to cement off sand section, pe in place and cap.
Plans are t	expected depths to objective sands; show a ling points, and all to I cave 600 ft. of 5½ countries of 100 ft. of 5½ countries of 100 ft.	sizes, weights, and lengths of proposed casings; indicate mudding jobs, comentationer important proposed world) asing in hole, to dement off sand section, the in place and cap.
Plans are: till hole v	expected depths to objective sands; show as ing points, and all to leave 600 ft. of 51 c. of the court of the surface pitth and leave surface pitth this plan of work must receive approval in	sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement- lother important proposed work) casing in hole, to dement off sand section, pe in place and cap.
Plans are t	expected depths to objective sands; show as ing points, and all to leave 600 ft. of 51 c. of the court of the surface pitth and leave surface pitth this plan of work must receive approval in	sizes, weights, and lengths of proposed casings; indicate mudding jobs, comentationer important proposed world) asing in hole, to dement off sand section, pe in place and cap. In writing by the Geological Survey before operations may be commenced.
Plans are trill hole v	expected depths to objective sands; show a ling points, and all to I cave 600 ft. of 51 contains and I cave surface pto the surface pto this plan of work must receive approval in Landa C11 Company	sizes, weights, and lengths of proposed casings; indicate mudding jobs, comentationer important proposed world) asing in hole, to dement off sand section, pe in place and cap. In writing by the Geological Survey before operations may be commenced.
