## **I. Design Plan**

**Above ground steel tanks will be used for the management of all plugging fluids.**

## **II. Operations and Maintenance Plan**

**Basic Energy will operate and maintain all of the above ground steel tanks involved in plugging operations in a prudent manner to prevent any spills. If a leak develops, the appropriate division district office will be notified within 48 hours of the discovery and the leak will be addressed. During an upset condition the source of the spill is isolated and addressed as soon as it is discovered. Free liquids will be removed and loose topsoil will be used to stabilize the spill. The contaminated soil will be either bio-remediated or excavated and taken to an agency approved disposal facility.**

## **III. Closure Plan**

**All plugging fluids will go to above ground steel tanks and will be hauled by various trucking companies to an agency approved disposal facility.**

**Impacted areas which will not be used for future service or operations will be reclaimed and reseeded as stated in the APD.**

COG Operating LLC.

API# 30-025-38698

#### Equipment & Design:

Basic Energy Services will use a closed loop system in the plug and abandonment of this well. The following equipment will be on location:

- (1) 250 bbl steel reverse tank

#### Operations & Maintenance:

During each day of operation, the rig's crew will inspect and closely monitor the fluids contained within the steel tank and visually monitor the release that may occur. Should a release, spill or leak occur, the NMOCD District 1 office in Hobbs (575-393-6161) will be notified, as required in NMOCD's rule 19.15.29.8.

#### Closure:

After plugging operations, fluids and solids will be hauled and disposed at Gandy-Marley Disposal's location, permit number NM 01-0019. Secondary site will be CRI Disposal, permit number NM 01-0006.
