Re: Intent to Re-enter
State #1-A, Sec.11, T11S, R32E

Gentlemen:

Your intention to re-enter the Lawton, State #1 well has been received. It is noted that you have proposed a gas well and have dedicated 320 acres which you are in the process of communitizing. However, the location, 660/N and 660/E is non-standard for a gas well to this depth. Statewide gas spacing is no nearer than 1980' from end boundary and 660' from side boundary and your location is non-standard in relation to the side boundary.

Since this is a re-entry you most likely will be able to obtain approval of this unorthodox location by the administrative process as allowed by our Rule 104 (F), copy enclosed.

CK
2-15-92 [As soon as your bond is approved we will go ahead and approve this re-entry with a stipulation that it cannot be produced as a Mississippian gas well until the non-standard location has been approved.]

If you have questions, contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
