The State Geologist,
New Mexico,

Dear Sir,

I am enclosing M/O for 50 cts. for which I would be extremely obliged if you would send me a copy of the Vierson and Brown, No 1 well log which was drilled to 5023 ft I understand and then abandoned. It was near Caprock and I should like to get the complete log to that depth.

I would especially ask that the ground level or elevation of this well be given and if you could give me the general level of the ground in the Hobbs Pool it would also be greatly appreciated

I have some interests in this district and cannot understand how they made such a mess of a well with such good showings as this well had as far as I can learn.

Yours very truly,

Thos. A. Ross.

I had a log of one of the Shell wells in the Hobbs field but somehow have mislaid it and suspect that the maid may have burnt it up.

If I recollect correctly the bottom of the hole (a 10,000 bbl) was at 4250 ft.
