THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I. OF THE ORIGIN OF THE EARTH

SECTION I. OF THE ORIGIN OF THE SOLAR SYSTEM

THE first question which presents itself to the mind is, what was the cause of the origin of the solar system? The answer to this question is, that it was the result of a natural process, which has taken place in the universe from time immemorial.

The second question which presents itself to the mind is, what was the state of the solar system at the time of its origin? The answer to this question is, that it was in a state of chaos, and that the elements of the system were in a state of confusion.

The third question which presents itself to the mind is, what was the process by which the solar system was formed? The answer to this question is, that it was the result of a process of condensation, which took place in the solar system.

The fourth question which presents itself to the mind is, what was the result of the process of condensation? The answer to this question is, that the result was the formation of the solar system, and the establishment of the laws of nature.

The fifth question which presents itself to the mind is, what was the state of the solar system at the time of its formation? The answer to this question is, that it was in a state of equilibrium, and that the elements of the system were in a state of order.

The sixth question which presents itself to the mind is, what was the process by which the solar system was maintained? The answer to this question is, that it was the result of a process of conservation, which took place in the solar system.

The seventh question which presents itself to the mind is, what was the result of the process of conservation? The answer to this question is, that the result was the maintenance of the solar system, and the preservation of the laws of nature.

The eighth question which presents itself to the mind is, what was the state of the solar system at the time of its maintenance? The answer to this question is, that it was in a state of equilibrium, and that the elements of the system were in a state of order.

The ninth question which presents itself to the mind is, what was the process by which the solar system was destroyed? The answer to this question is, that it was the result of a process of destruction, which took place in the solar system.

The tenth question which presents itself to the mind is, what was the result of the process of destruction? The answer to this question is, that the result was the destruction of the solar system, and the annihilation of the laws of nature.
