This well was originally drilled by The Texas Company as the State of New Mexico "BX" NCT-1 in September 1953. The well was plugged and abandoned in March, 1954. Yates Petroleum Corporation proposed to drill out the surface plug and clean out the well to the top of the plug set at 3610' across the 9-5/8" casing and test the plug. Will perforate and test the Queen formation at approximately 3025-3050'.
