It is proposed to squeeze present perfs 9486-92 with 200 sacks cement, drill out and perforate 9889-92 with 2 jet shots per foot. Treat with 500 gallons mud acid and attempt completion. If commercial production is not obtained it is proposed to set bridge plug at 9865, cap with 1 sack cement and perforate and test 9842-46. If no production is obtained to set bridge plug at 9800 and perforate and test 9348-54.
