This well has been temporarily abandoned since March 3, 1950.  
 We now wish to recover as much 7" casing as possible from this well and plug and abandon same. The 9 5/8" intermediate string was set at 3940 and was cemented to the surface. The hole will be filled with mud laden fluid, a 50' cement plug will be placed in the top of the 9 5/8" casing, after which it will be bull plugged.
