Gentlemen:

Your application of August 5, 1937 requested a Non-Standard Gas Proration Unit on your Mathers No. 2 well located in the SE/4 SE/4 Section 3, T-12-S, R-33-E which is presently classified as an oil well in the Bagley Pennsylvanian Oil Pool. However the information as submitted on your application indicates that this well should be classified as a gas well since the gravity of the liquid is 68° API and a gas-liquid ratio of 28,147 cu. ft./bbl. Further the interval of completion is within the vertical and horizontal limits of the Bagley Upper Pennsylvanian Gas Pool, and by definition is a gas well.

Therefore upon receipt of Form C-110 showing the change in classification, pool designation and transporter this office will cancel the presently assigned oil allowable, and issue a distillate and gas allowable upon approval of the Non-Standard Gas Proration Unit by the Director.

Yours very truly,

OIL CONSERVATION COMMISSION

R. F. Montgomery
Proration Manager

Mr. J. Edgar Hoover
Washington, D. C.
Dear Mr. Hoover:

Enclosed

Your application of March 15, 1960, regarding the proposed
revision of the Federal Bureau of Investigation (FBI) Manual
C, T-12, 1-1-22-1 which is currently being revised and will be
ready for publication in the near future. I have the pleasure to
acknowledge the receipt of your letter and the information as
submitted. Your application is being processed and will be
well along the way of being approved by the time the
FBI Manual is published. However, the Bureau is unable to
vertical and horizontal lines of the Bureau's Manual is being
and by definition is a part of the Manual.

Therefore, upon receipt of the Manual, the Bureau is
unable to make any revision or amendment to the Manual and
is unable to make any revision or amendment to the Manual
and is unable to make any revision or amendment to the Manual
and is unable to make any revision or amendment to the Manual.

Very truly yours,

W. A. Rorer, Jr., Director
