Re: Vada SWD "L" Well No. 3
NW/4 SW/4 Section 3,
T10S, R34E, Lea County,
New Mexico

Gentlemen:

Please find enclosed Form C-103 for subsequent report of tubing leak repair, packer installation and casing test on the above referenced salt water disposal well. We are also enclosing a wellbore schematic for your convenience.

Vada SWD "L" Well No. 3 was a packerless completion utilizing floating oil blanket until the recent workover of May 1990. In view of cement top at 8200' behind 7" liner, verbal approval of OCD District I was granted to set packer below this depth covering a disposal interval to open hole TD of 13,400'. Original pressure recording chart displaying tubing-casing annulus integrity at 420 psi for 29 mins. is attached to Form C-103.

Should you require additional information regarding this subsequent report, please contact our office.

Yours very truly,

RICE ENGINEERING CORPORATION
