Rigged up Charger, Inc. at 9:00 A.M. Completed loading casing with 33 barrels  $\frac{1}{2}$  and  $\frac{1}{2}$  with corrosion inhibitor. Pressured casing to 480# with 8 BW after bleeding off air. Pressure held okay 30 minutes. Had bleed back from casing for 15 min. indicating probable leak in casing. Restored well to disposal. Test witnessed by Jack Griffin of OCC.
