

Unichem 370 chemical. Casing did not load but was nearly loaded as there was no vacuum on casing after pumping the water.

3-26-87. Llano Field Service hot oiler completed loading casing with 10 bbs. brine and pressured to 370 psi. Installed pressure recorder to record casing pressure for test. Pressure dropped to 360 psi in 15 minutes. Tubing pressure remained stable at 16" Hg. vacuum throughout the test. Restored well to disposal.
