17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Commenced operations October 24, 1965. Milled and drilled junk from surface to 9641'. Hole deviated to 17-1/4° at 10,179. Spotted 200-sack cement plug plus 3000# sand and 50# Floseal from 10,292 to 9220. Cement squeezed into old perforations 9617-9635. Encountered salt water flow from 9728-9741. Water flowing at the rate of approximately 300 barrels per hour. Water appears to be from the zone in which Mobil injected during the operation of the Bough Field. Recemented with 75 sacks plus 35# CFR-2 plus 15# sand per sack from 9931-9745. Set retrievable whipstock at 9774 to attempt to straighten hole. Unsuccessful. Drilled in old hole to 9867. Set retrievable whipstock and side-tracked at this point. Now drilling at 10,103'.

Verbal approval for side-tracking hole obtained from Joe Ramey on 11-22-65.

Copies of this report being sent to Pan American Petroleum Corporation as the only offset operator of record to this location.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
