PMX _____

Gentlemen:

I have examined the application for the:

Layton Enterprises Inc. *Merrell #1-H* *10-9-36*
Operator Lease & Well No. Unit S-T-R

and my recommendations are as follows:

1

Yours very truly,

Jerry Sexton
Jerry Sexton
Supervisor, District 1

/ed

APPLICATION FOR AUTHORIZATION TO INJECT

I. Purpose: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? yes no

II. Operator: LAYTON ENTERPRISES, INC.

Address: 3103 79TH ST LUBBOCK, TEXAS 79423

Contact party: D.E. LAYTON Phone: 806/775-4638

III. Well data: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.

IV. Is this an expansion of an existing project? yes no
If yes, give the Division order number authorizing the project _____.

V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.

* VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.

VII. Attach data on the proposed operation, including:

1. Proposed average and maximum daily rate and volume of fluids to be injected;
2. Whether the system is open or closed;
3. Proposed average and maximum injection pressure;
4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and
5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).

*VIII. Attach appropriate geological data on the injection zone including appropriate lithologic detail, geological name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such source known to be immediately underlying the injection interval.

IX. Describe the proposed stimulation program, if any.

* X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division they need not be resubmitted.)

* XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.

XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground source of drinking water.

XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.

XIV. Certification

I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.

Name: DONALD R. LAYTON Title: PRESIDENT

Signature: Donald R. Layton Date: 8-10-90

* If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be duplicated and resubmitted. Please show the date and circumstance of the earlier submittal.

DISTRIBUTION: Original and one copy to Santa Fe with one copy to the appropriate Division district office.

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; location by Section, Township, and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) the intended purpose of the injection well; with the exact location of single wells or the section, township, and range location of multiple wells;
- (3) the formation name and depth with expected maximum injection rates and pressures; and
- (4) a notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, P. O. Box 2088, Santa Fe, New Mexico 87501 within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Affidavit of Publication

STATE OF NEW MEXICO)

) ss.

COUNTY OF LEA)

Joyce Clemens being first duly sworn on oath deposes and says that he is Adv. Director of THE LOVINGTON DAILY LEADER, a daily newspaper of general paid circulation published in the English language at Lovington, Lea County, New Mexico; that said newspaper has been so published in such county continuously and uninterrupted for a period in excess of Twenty-six (26) consecutive weeks next prior to the first publication of the notice hereto attached as hereinafter shown; and that said newspaper is in all things duly qualified to publish legal notices within the meaning of Chapter 167 of the 1937 Session Laws of the State of New Mexico.

That the notice which is hereto attached, entitled
Legal Notice

and numbered in the Court of Lea County, New Mexico, was published in a regular and entire issue of THE LOVINGTON DAILY LEADER and not in any supplement thereof, once each week on the same day of the week, for One (1) consecutive weeks, beginning with the issue of
August 10 19.....

and ending with the issue of
August 10 19.....

And that the cost of publishing said notice is the sum of \$..... 5.43

which sum has been (Paid / Assessed) as Court Costs

Joyce Clemens
Subscribed and sworn to before me this 13th
day of August 19.....

Mrs. Jean Series
Notary Public, Lea County, New Mexico
My Commission Expires Sept. 28 19.....

LEGAL NOTICE

Layton Enterprises, Inc., 3103 79th St., Lubbock, Texas, 79423, Donald R. Layton, 806/745-4638 had made application to the State of New Mexico, Oil Conservation Division for permit to dispose of produced salt water into the Merrill No. 1 well located 1980 feet FNL and 330 feet FEL, Sec. 10, Twp. 9S, R36E, Lea County, N.M. Injection will be into the Bough "C" (Penn) Formation at a depth of 9793-9825, anticipated maximum rates of 600 B/D at zero pressure. Interested parties may file objection or request for hearing within 15 days to Oil Conservation Division, P. O. Box 2088, Santa Fe, N.M. 87501.

Published in the Lovington Daily Leader August 10, 1990.

 (brand and model)

(or describe any other casing-tubing seal).

Other Data

1. Name of the injection formation BOUGH "C" (PENN)

2. Name of Field or Pool (if applicable) ALLISON PENN

3. Is this a new well drilled for injection? Yes No

If no, for what purpose was the well originally drilled? Oil Production

4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail (sacks of cement or bridge plug(s) used)

No

5. Give the depth to and name of any overlying and/or underlying oil or gas zones (pools) in this area.

8950 - ABO

7800 - SAN ANDRES

FORM C-108

SUPPLEMENTAL DATA

- VII. 1. Proposed average daily injection rate is 300 B/D with anticipated maximum rate of 600 B/D.
2. The injection system will be closed.
3. Anticipated injection pressure will be zero at the wellhead.
4. Source of injected fluid will be from the Bough "C" Formation from the Allison Penn Field (same zone as the injection zone).
- VIII. The Bough "C" Zone is a fine crystalline vuggy limestone of Pennsylvanian age identified by late Cisco Fossils. The gross zone is normally 30 feet thick and in the proposed injection well is found at a depth of 9793 (-5721).

Fresh water zones are almost non-existent in this area. A few wells of very low capacity have been found at a depth of 150-200 ft.
- IX. No stimulation of the well is planned.
- X. Well logs are on file with OCD. Last production test was in May 1982: 5 BOPD - 28 BWPD.
- XI. At present there are no fresh water wells producing within a one mile radius and analysis is not available.

AFFIRMATIVE STATEMENT

As required by Item XII of Form C-108, Layton Enterprises, Inc. has examined available geologic and engineering data and find no evidence of open faults or other hydrologic connection between the disposal zone and any underground source of drinking water.
