The elevation of the derrick floor above sea level is 4057 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

8-25-63

Run up and set tubing, anchor, set 10 sack plug over perforations on 9530 to 9540. Top of plug at 9535. Circulated with mud. Fluid. Pulled tubing to 9550 and set 20 sack plug. Circulated with mud. Pulled tubing and set 10 sack plug at surface with regulation marker welded to surface casing. No attempt was made to fill any casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
